Abstract

PROBLEM TO BE SOLVED: To simplify the job of the user at a transfer destination when a device is used for a remote scanner at the transfer destination.

SOLUTION: An original is read by a scanner 4, and read original image data are stored in an external storage device 21. The storage area of the original image data stored in the external storage device 21 is informed of a transfer destination received via an operation section 3, and the original image data stored in the external storage device 21 upon the receipt of a transfer request from the transfer destination are transferred to the transfer destination. Furthermore, plural transfer destinations for common original image data are entered as a group, and the storage address of the common original image data stored in the external storage device 21 is notified of the plural transfer destinations in the group.
